

INNOCAM AI

CAI26901-Ai Face Recognition Camera

Overview

The INNOCAM AI CAI26901 is a high-intelligence, wide-angle bullet camera engineered for proactive perimeter security and automated threat detection. Equipped with a powerful edge-AI engine, it features simultaneous multi-face tracking alongside advanced whitelist and blacklist detection to instantly recognize authorized VIPs or flag unauthorized individuals. For uncompromised clarity, the camera pairs a broad field of view with precise motorized optical zoom and focus, capturing sharp facial detail from a distance. Built with dual Wi-Fi and Ethernet support for flexible deployment, it is also fully MQTT-enabled, delivering instantaneous, low-bandwidth alerts to your automation network the millisecond a security event occurs.
